

Blackboard Consulting Credit Card Data Elimination

Sensitive cardholder information stored in your database makes your transaction system vulnerable. As campuses and Blackboard strive to reach the Payment Card Industry standards to protect this data, the awareness of exposure and risk associated with storing this data becomes compelling and the requirement for protection becomes paramount.

Blackboard Consulting's Credit Card Data Elimination solution eliminates the credit card number and expiration date from historical data and from newly completed transactions in your database, timely and automatically.

Blackboard Credit Card Data Elimination Solution Helps Clients:

- Reduce risk of compromise.
- May increase consideration of Merchant Processor ID issuance.

Blackboard consultants will meet with campus staff, implement the solution, and remotely train on verification. No system downtime is required for implementation.

Specific Blackboard Deliverables:

- Remote Kickoff
- Assessment of Variables
- Solution Documentation
- Solution Implementation on Test Server
- Solution Implementation on Production Server
- Validation Training
- Two-week Testing Period
- Maintain Solution on Implementation Server

Blackboard will adjust your campus interval variable, as necessary.

Getting Results:

Blackboard has provided many institutions with the guidance to achieve their operational and long-term revenue generating goals.
