

A Long Relationship Built on Integration, Robust Functionality and Reliability

NCR® enables attended commerce with Transact™ through robust, feature-rich point of sale (POS) terminals and wireless peripherals designed for the demanding needs of today's on-site retail and hospitality environments. Through Blackboard's unique relationship with NCR Corporation, a leading global manufacturer of retail POS terminals, the ID card is transformed into a powerful purchasing tool for a variety of on-site retailing environments, including dining centers, specialty stores and convenience stores.

The seamless integration between Blackboard and NCR-built terminals and wireless peripherals is evident from the first day of operation. Whether implementing the NCR RealPOS™ 21 at an on-site convenience store or the NCR RealPOS 70 at the main dining center, fast transaction response times translate into better customer service and satisfaction. Dining center lines move faster and lost sales due to long lines are a thing of the past. Customers enjoy improved service and the convenience of paying with a prepaid debit card powered by Blackboard Transact.

NCR devices provide businesses and organizations with unique capabilities based on new embedded technology, tool-free serviceability and maximum configuration flexibility. By eliminating

the need for ancillary equipment, the new embedded technology in NCR devices helps to conserve valuable counter space at the point of sale. Tool-free serviceability improves the organization's ability to perform regular service on equipment in a quick and efficient manner. Finally, by providing maximum configuration flexibility NCR devices allow for unique and creative configurations based on any number of customer demographics.

Blackboard has certified both the NCR RealPOS 21 and NCR RealPOS 70 with the Blackboard platform. These terminals transform the checkout line into a well-run machine for both operator and customer with robust operation, ease-of-use and next-generation touch screen technology.

"I appreciate the business efficiencies and value the NCR terminals provide to our dining and retailing community. Having a single unified system is key to the success of my business model."

-Brenda Hovden
*Director of Card Services
Creighton University*

NCR RealPOS 21

Ideal for locations where space is at a minimum, the NCR RealPOS 21 is an affordable, feature-rich solution supported by certified NCR peripherals and applications. This compact terminal is designed for high availability and maximum return on investment. Businesses and organizations can increase productivity and customer service levels with this easy-to-learn terminal backed by the strong relationship between Blackboard and NCR.
