

Blackboard Learn™ for Course Delivery GUI Administrator Certification

Blackboard Online Blackboard Training

Overview

This facilitated online course provides you with the skills necessary to successfully set up and manage the Blackboard Learn™ - Course Delivery application through the graphical user interface (GUI). Through tests, assignments, discussions, and activities, the course introduces you to features and functions which are accessed through the System Administrator tab. In addition, the course reviews best practices for managing users and courses, and outlines procedures for maintaining the system. This course does not provide instruction for managing the application at the server level.

The certification component includes completion of all course activities and assignments, and achievement of a score of 80% or higher on the final objective exam. Upon successful completion you will receive a certificate issued by Blackboard Inc. verifying that you have demonstrated mastery of the identified competencies.

Course Objectives

- Navigate the Administrator Panel of the Blackboard Learn - Course Delivery module
- Differentiate between System and Course Roles
- Create and modify privileges for custom system and course roles
- Create, edit, and delete users and courses
- Manage course enrollments
- Designate the availability status of system-wide tools and utilities
- Manage settings for Notifications, Avatars, and Language Packs
- Establish a default institution brand
- Upload and configure Blackboard Building Blocks
- Access and interpret log file information
- Navigate Behind the Blackboard™ site to issue support tickets and locate reference materials
