

Enterprise or Departmental Licensing

UNLIMITED LEARNING. ONE FLAT FEE.

Academic institutions are looking for ways to save on travel and administration. Plus, they want enterprise-wide online learning programs and collaboration tools to meet the needs of today's active learners, drive faculty adoption of learning technologies, and accommodate the growth needed to be successful.

Our Enterprise or Departmental Licensing is a flat-fee, volume-licensing plan designed to encourage use without the hassles of restricted software licenses, usage predictions, or charges for exceeding seat limits. You get full access to all Blackboard Collaborate™ platform capabilities: web conferencing, enterprise instant messaging, and voice authoring. And now, with Blackboard Collaborate mobile capabilities, your students can access live sessions from their tablets and mobile phones.

Accelerate Learning from Department to Enterprise

With Enterprise or Departmental Licensing for Blackboard Collaborate, learning is truly unlimited, continuous, viral, and accelerated, so you can expand your reach. By enabling access for all instructors, students, and administrators in a single department or your entire academic enterprise, you can drive adoption and increase ROI.

The license includes Blackboard Collaborate web conferencing with mobile collaboration, enterprise instant messaging, and voice authoring hosted by Blackboard. You also get technical support services, standard training, and Blackboard Collaborate integrations for deployment with your learning or course management system. And with domains for departmental partitioning and management and imported class rosters, you retain control. So teach, collaborate, and communicate whenever you want—without the worries of lockout or unpredictable fees.

WHY ENTERPRISE LICENSING?

- **Unlimited users and sessions**
No restrictions mean more learners and more learning
- **Simplicity**
No need to track minutes, count learners, or administer the system
- **Mobile access to web conferencing**
Provide access for more learners in more ways
- **Predictability**
Single, flat fee with no per-minute overage charges
- **Rapid ROI**
More users and uses of Blackboard Collaborate mean high ROI
- **Plan for Growth**
Supports increased adoption across your institution

What You Get

For all users in a defined entity, such as department, campus, or campus network, you get:

- ▶ Blackboard Collaborate web conferencing, enterprise instant messaging, and voice authoring
- ▶ Mobile access to web conferencing (Blackboard Collaborate 12 or higher required)
- ▶ Integrated VoIP audio and built-in phone conferencing
- ▶ Specialized features for creating content and agendas and publishing post-session recordings
- ▶ Blackboard Collaborate integrations for deployment with your LMS
- ▶ Any language packs
- ▶ On-Demand Learning Center as offered on the Blackboard Collaborate website
- ▶ Standard technical support, including support for end users
- ▶ Automatic software service updates, including new releases
- ▶ System administration and monitoring for high QoS

Plus, we offer Implementation Services designed to maximize your enterprise license.

What It Costs

Enterprise or Departmental licensing is a single, fixed annual fee for one to three years. Price is based on size of your department or institution, with a discount for a multiyear commitment.

Terms of Use

24x7 access for all users in a defined entity. Participants can use Blackboard Collaborate as frequently or for as long as they want. No time limits, feature use restrictions, seat caps, or per-minute overage charges.

Why Blackboard Collaborate?

- ▶ Add live interaction and personalization to distance learning
- ▶ Extend boundaries of physical classroom
- ▶ Reach and engage more learners live and on demand
- ▶ Facilitate formal and informal learning anywhere, anytime
- ▶ Improve outcomes, even for first-time or less-technical users
- ▶ Create reusable learning objects
- ▶ Leverage institutional expertise
- ▶ Build community and foster social networking
- ▶ Facilitate research and collaboration
- ▶ Increase competitive advantage
