

## Overview

The objective of the SIS Integration Technical Knowledge Transfer (TKT) is to provide a remotely delivered mentoring service to a client moving to the new SIS Integration Framework found in Blackboard Learn™ Release 9.1 Service Pack 8 and above from the Snapshot Controller. This service will provide the client with planning, auditing, guidance, scripting technique overview, troubleshooting and a final report documenting the data integration process.

This service begins with a kick-off call to determine scheduling, logistics, and proper scoping of the SIS Integration TKT to meet the client's needs. All sessions listed below will be delivered during scheduled Collaborate sessions. The time, day, and duration of these sessions will be scheduled during the service kick-off call with the assigned consultant.

## Workshop Topics:

### Week 1 – 20hrs

- Artifact Updates – 1hr
- SIS Technical Overview – 2hrs
- Data Planning Workbook Overview – 2hrs
- File Review / Data Mapping – 2.5hrs
- Generator Guidelines Updates, Sample File Creation - 2hrs
- Custom Script Identification / Development / Testing by Blackboard Consultant – 6hrs
  - Active participation from client not expected, but calls / communication may be required for Blackboard Consultant to clarify any questions during development and testing
- Follow up questions and review – 3hrs

### Week 2 – 15hrs

- Configuration – 3.5hrs
- Testing/Troubleshooting – 4.5hrs
- Custom Scripting – 3.5hrs
- Data Lifecycle Timeline and Data Maintenance – 3.5hrs

### Follow Up – 8hrs

- Follow-Up Questions
- Additional Testing/Troubleshooting
