

Overview

The objective of the Open Database Reporting Technical Knowledge Transfer service is to provide clients with the knowledge necessary to successfully build Blackboard Learn™ reports by providing a 2-day onsite workshop or expanded remote delivery that includes documentation, technical exercises, ad-hoc queries, and a final report delivered by Blackboard Consulting that will enable the client to become self-sufficient in their Blackboard database and report generation activities. The remote delivery option offers flexible scoping of duration based on the needs of the client.

Workshop Topics:

Introductions / Environment Setup

- Blackboard background and contacts
- Client Introductions and objectives

Database Schema Review, Best Practices, and Reporting with the following Entities

- Users
- Courses
- Enrollments
- Lesson Content
- QTI
- Announcements
- Discussion Forums
- Gradebook
- Activity Tracking

Who Should Attend

Blackboard developers who wish to extract data from Blackboard Learn™ 9.1.x and above who meet the following requirements:

- Administrator level access to a Blackboard Development environment, both at the application and database levels.
- Basic level, or above, understanding of Blackboard Learn functionality
- Basic level, or above, understanding of SQL and the Blackboard Learn database environment

Duration and Costs

- 2 days Onsite or Expanded Schedule for Remote Delivery
- \$16,000 USD for up to 5 participants (consultant travel and expenses are not included in the cost)

For any questions, please email training@blackboard.com, or contact your Blackboard Account Executive.
