Duration
This workshop is delivered using Blackboard Collaborate in 1 two-hour session.

Webinar Content
This webinar explores the features and functionality of the Ultra Experience. It’s critical that stakeholders have the knowledge to unlock the power of Ultra to develop engaging online courses. During the session participants, will engage with the facilitator through discussion and demonstration. Demonstration will focus on navigation, course and content development, creating gradable items, and managing the gradebook. Best practices will also be discussed as they relate to teaching efficiency and effective course development for maximum student success.

Who Should Attend
This webinar is intended for Instructors, Course Builders, and Instructional Support Staff who are responsible for creating, using, or managing courses using Blackboard Ultra.

Workshop Objectives
Upon completion of this webinar, participants should be able to:

- Understand and navigate the base navigation.
- Customize and filter the activity stream.
- Create calendar items and course messages.
- Identify and explore course conversion process.
- Understand and apply a course organization structure.
- Review the various types of content.
- Design and monitor engaging discussions that encourages student collaboration.
- Identify and create different assessment activities.
- Understand and leverage grading rubrics.
- Grade assessments and discussions.
- Understand the gradebook workflow.
- Utilize the gradebook to manage and apply course grading policies.

Delivery Modality
Webinar is delivered in 1 two-hour synchronous Collaborate session followed up by one hour of guided asynchronous hands-on practice activities.
