

Blackboard Instructor

A modern, accessible, and delightful mobile experience designed just for instructors

Use Blackboard Instructor to streamline tasks and drive engagement by meeting students where they are—on their mobile devices.

Requirements:

- Blackboard Learn 9.1 version October 2014+ or Blackboard Learn SaaS
- Mobile Web Services Building Block 94.9.5+
- Mobile license or a solution bundle with mobile
- Any device running on iOS 9+ or Android 4.2+

Key Functionality

Navigation

We've categorized and grouped the most relevant features in one place, so instructors can quickly and easily access courses and content.

Course Management

View a list of all courses for available terms and get a summary of each course including upcoming assignments, announcements, discussions, and more.

Content and Assessment Preview

Review course content and assessments created in Blackboard Learn on mobile to ensure content is accurate and mobile-friendly.

Discussions

Participate in discussions from anywhere via a mobile device. Instructors can view, create, and edit discussion board threads and replies.

Announcements

Create, review, and send out announcements to students. Students will be alerted with a notification in the Blackboard app Activity Stream.

Collaborate*

Engage in real-time video conferencing to collaborate with video, voice, files, chat, and interactive whiteboard on the go.

*If you license Blackboard Collaborate

For mobile grading functionality, instructors can use the Bb Grader iPad app. Grading workflows are scheduled to be added into Blackboard Instructor in the coming months.
