

Cashnet® Cashiering

Turn your iPad® device into a mobile cash register with the

Cashnet® Mobile Payments App

This mobile app allows you to accept electronic payments on the go at events all over campus. You'll offer the convenience payers want.

Key features for students

- › Offers expedited in-person payment experience, either in the business office or attending a campus activity
- › Provides students with the flexibility to use multiple tender types
- › Gives students fast updates to account balances

Activate in-person payments

Give your entire campus the option to make an in-person payment, either in the business office or through our mobile solution.

Our Cashiering solution enables campus departments to process over-the-counter payments, to offer a streamlined approach that uses a one-step, one-stop transaction with easy back-office reconciliation.

Benefits for your staff

Configures easily for quick-click payment processing.

Seamlessly integrates with many ERP systems, including homegrown.

Allows users to research and report on all customer information from one centralized platform.

Reduces the cost and effort related to PCI compliance.

Simplifies end-of-day balancing and reconciliation.

Provides web-based departmental deposit entry and receipting.

Ability to set up stations anywhere on campus and configure to specific payment acceptance functions.

Assists with cash-management activities like petty cash, check cashing, and vault management.

Accepts EMV, NFC, Magnetic Stripe, and keyed cards through the encrypted IPP320 device.
