

Blackboard Learn™ and Dropbox Education integration: built to increase productivity

Blackboard and Dropbox have partnered to integrate Blackboard Learn and Dropbox Education in order to save instructors and learners time and effort while increasing productivity. Blackboard Learn's seamless integration with Dropbox Education enables users to use the tools they prefer, while driving adoption and maximizing your institution's technology investments.

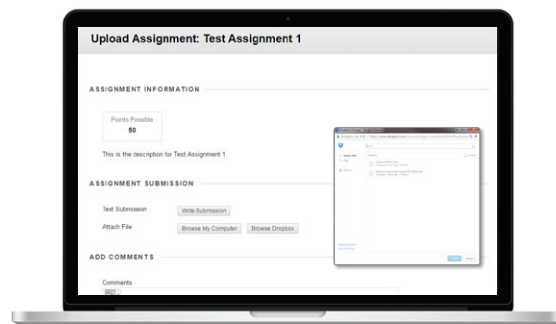

Save instructors time and effort

Through the integration, instructors and learners can quickly and easily link to Dropbox content from their Blackboard Learn courses. Instructors are able to store, update, and add permissions to a document in one place—Dropbox—with the assurance of knowing that all links in Blackboard Learn will automatically reference the most recent version of their content.

To add Dropbox content into Blackboard Learn, instructors will simply use the mashup functionality within the visual textbox editor (VTBE).

The “Browse Dropbox” button allows learners to upload assignments directly from Dropbox.

Simplify assignment uploading for learners

When uploading an assignment into a Blackboard Learn course, learners can choose the option to add content directly from Dropbox. This integrated workflow provides learners quick and easy access to their assignment content.

Maximize your institution's investments

Deploying powerful, easy-to-use tools drives adoption which strengthens the value of your institution's technology investments. And bringing these tools together into an integrated solution leads to increased user satisfaction and deeper engagement across your entire user community.

Why Dropbox Education?

Dropbox Education connects your campus with the collaboration tool instructors and learners prefer, letting them work anywhere, on any device. Shared folders enable seamless group collaboration and enterprise-grade security features give you the control and visibility you need to manage data across classes, teams, and departments.

Provides direct access to your content

- Seamlessly authenticate to Dropbox Education through Blackboard Learn
- Access your Dropbox learning content from any device, online or offline
- Manage your learning content in one place

Supports and facilitates group collaboration

- Enable faculty, staff, and students to work on files of any size or type with cross-device sync
- Support collaborative content creation via permissions and version controls
- Engage with a global collaboration network of 500M Dropbox users

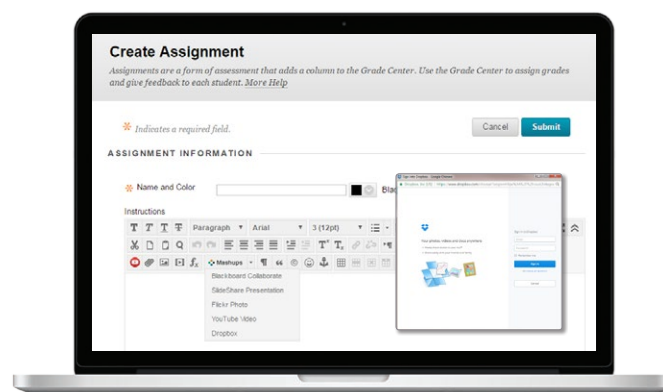

Powers user management and secures your institution's content

- Gain visibility and control to manage users, monitor activity, and control sharing permissions
- Secure your data with multiple layers of protection
- Ensure compliance with the most widely accepted standards and regulations

Get started today

The Dropbox Education Building Block – compatible with the Blackboard Learn 9.1, Q2 2016 and Q4 2015 releases – is now available for download. This building block enables seamless authentication to Dropbox from Blackboard Learn, and makes linking directly to Dropbox content from Blackboard Learn simple and easy.

Blackboard Learn SaaS and 9.1, Q4 2016 versions – and newer – have the building block pre-installed, allowing instructors and students to link to their Dropbox content directly from Blackboard Learn using the mashup functionality. Additionally, this building block offers students the ability to upload assignments directly from their Dropbox account into Blackboard Learn.

Users are able to seamlessly authenticate to Dropbox Education from Blackboard Learn™.
