

Educators are building the next generation of online courses.

From March through May of 2020, they were...

...seeking out innovative ways to engage students.

1,000% increase

in readership of content about “motivating online learners” year over year.

50,000 hours

of digital teaching professional development.

...pushing the boundaries of what learners can do online.

600% increase

in the installation of lab simulation tools year over year.

...working hard to make digital content inclusive.

366,646 files

improved by educators for accessibility.

...getting tools in place to ensure learning is happening.

700% increase

in the use of online proctoring tools year over year.
