About This Course

Course Content

"Fundamentals of Digital Teaching and Learning" provides participants with the competencies required for teaching in a blended learning or e-learning environment. The course is delivered through a series of modules that are assessed and certified by Blackboard in co-operation with its training partners. Participants will be assessed and, if successful, certified by Blackboard.

Course Materials and Requirements

You will be provided with a comprehensive workbook that will enable you to develop the competencies you need to become a Blackboard accredited "Associate in Digital Teaching and Learning".

Who Should Attend

This course is designed for individuals working in, or intending to work in, an organization that provides blended or e-learning.

Important Information

Direct questions to bbacademy@blackboard.com or your Blackboard Account Representative. Participants will be issued a username and password for this course in order to access the Blackboard Learning Management System and participate in activities during the session.
